

Bulb Planting Tips

Planting and Spacing

For best results, follow the tips below:

Large bulb size: Plant 4 bulbs per square foot.

Small bulb size: Plant 9 bulbs per square foot.

50 Square Feet: 200 large bulbs at 6" apart; 450 small bulbs at 4" apart

100 Square Feet: 400 large bulbs at 6" apart; 900 small bulbs at 4" apart

How Deep?

The general rule of thumb for planting spring bulbs: Plant two to three times as deep as the bulb is tall. Large bulbs like tulips or daffodils will be planted about 6 inches deep while smaller bulbs will be planted 3-4 inches deep.
